

FET PC meeting 22 March 2019, Brussels

Preparatory Actions for FET Flagships

Flagships Unit
DG Connect, European Commission

6 + 1 topics, one year

“Launch of six European initiatives with potential for transformational impact on society and the economy” – 5 March 2019

- Humane AI
- Time Machine
- Lifetime
- Restore
- Energy-X
- Sunrise
- **Battery 2030**

Start date: 1 March 2019

Duration: 1 year

Mid-point: September 2019

HUMANE AI

*Design and deploy **AI systems** that **enhance human capabilities and empower people** - both as individuals and society as a whole: to **develop AI that extends rather than replaces human intelligence**.*

- ❑ coordinated by DFKI (DE)
- ❑ 35 partners from 17 countries
<http://www.humane-ai.eu/>

Challenges include:

- ❑ learning complex world models;
- ❑ building effective and fully explainable machine learning systems;
- ❑ adapting AI systems to dynamic, open-ended real world environments;
- ❑ achieving in-depth understanding of humans and complex social contexts;
- ❑ and enabling self-reflection within AI systems.

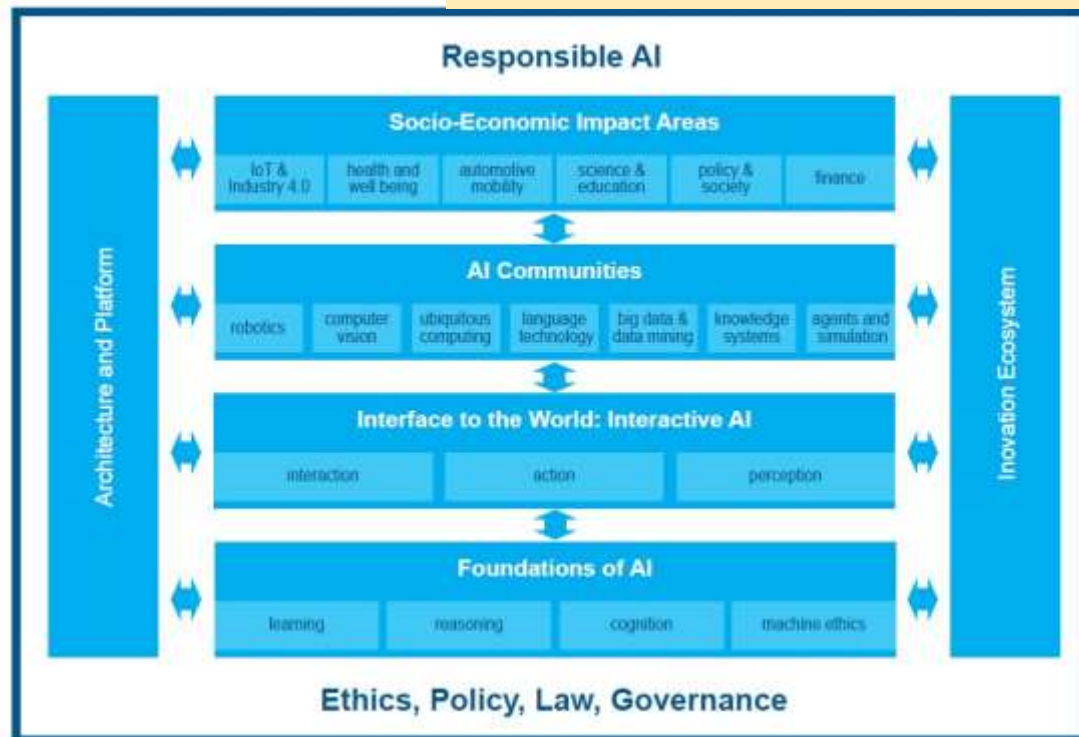

Figure 2. Structure of the research agenda of the proposed Humane AI Flagship.

Major planned events:

☐ *June 2019*

- ☐ Stakeholder workshop I

☐ *September 2019*

- ☐ Roadmap
- ☐ First version of a consolidated organization and operation plan, impact strategy and research plan

☐ *December 2019*

- ☐ Stakeholder workshop II

☐ *February 2020 - HumanE AI global summit*

- ☐ Final version of the initiative concept, organisation and operation plan, impact strategy and research plan

European
Commission

Time Machine

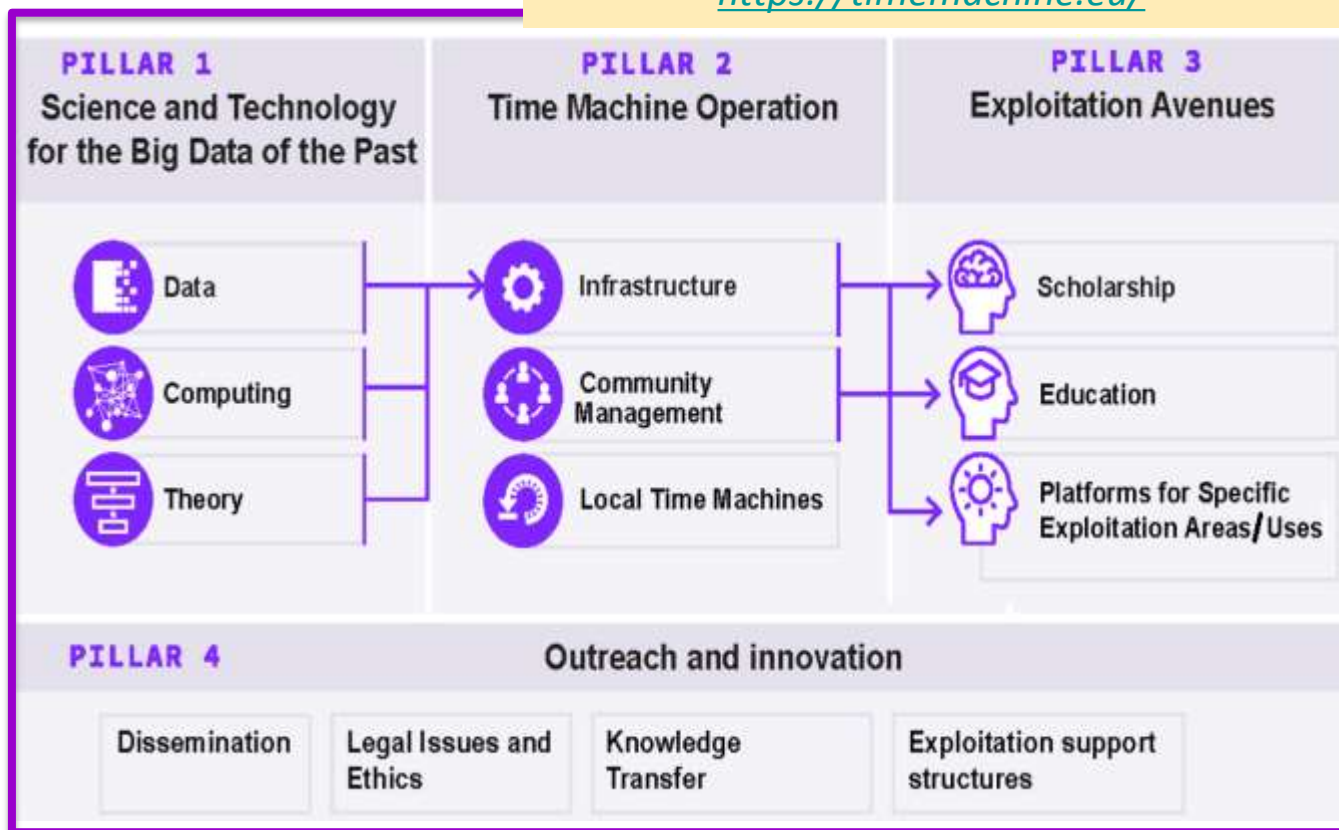

Time
Machine

*To build a **large-scale digitisation and computing infrastructure** (based on multi-scale modelling and simulation & AI technologies) for digitising huge volumes of information from **Europe's historical archives, large museum and library collections, and geo-historical datasets** that are **mapping millennia of European historical and geographical evolution.***

- ❑ coordinated by Frédéric KAPLAN (EPFL)
 - ❑ 33 partners from 11 countries
- <https://timemachine.eu/>

IMPACT: Making available these vast amounts of Europe's cultural and historical knowledge will have a profound effect on understanding Europe's historical and societal evolutions and an impact on key sectors such as the ICT industry, creative industries, and tourism.

Major planned events:

☐ ***April 2019***

- ☐ *TM Manifesto*

☐ ***June 2019***

- ☐ *Draft roadmaps of the 4 TM pillars*

☐ ***October 2019:***

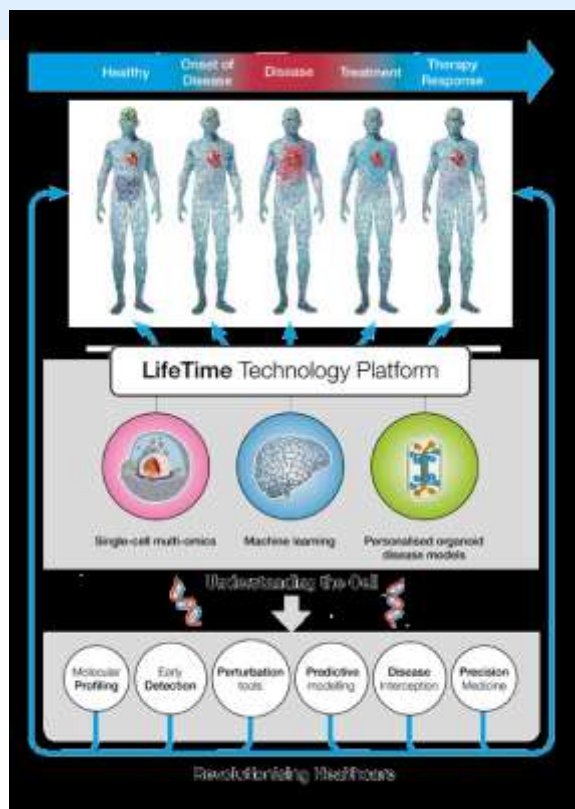

- ☐ Roadmaps of the 4 TM pillars
- ☐ TM 2019 conference (Dresden, Germany)

☐ ***December 2019:***

- ☐ TM preparatory action's final conference

*To decipher how diseases start and progress in the human body by developing and integrating several break-through technologies including **single-cell multi-omics and imaging, machine learning and AI, and personalised disease models such as organoids**. This is a major challenge and will have dramatic impact on the **early detection, prevention and innovative treatment of chronic and progressive diseases**.*

- ❑ coordinated by Max Delbrück Center for Molecular Medicine (DE)
- ❑ 17 partners from 17 countries
<https://lifetime-fetflagship.eu/>

- ❑ Further develop the LifeTime vision and unifying goal.
- ❑ Engage with a wide-variety of stakeholders.
- ❑ Produce a strategic long-term S&T Roadmap.
- ❑ Define a blueprint for LifeTime's implementation.
- ❑ Establish an effective scientific leadership and governance structure.
- ❑ Arrive at a consolidated LifeTime framework.

Major planned events:

- ❑ **June 2019: Opening Conference** - Leading international experts and the wider scientific community will be invited to describe the state-of-the-art, challenges and progress in potential technologies to be integrated in the LifeTime Technology Platform.
- ❑ **August 2019: international interdisciplinary “unconference”** to deliver the basis for developing the S&T Roadmap of the LifeTime Technology Platform.
- ❑ **December 2019: 2-day Open Space Conference** to present the LifeTime industry strategy and innovation framework.

Major planned deliverables:

- ❑ **August 2019:** Governance/structure models white paper
- ❑ **October – November 2019:** 8 white papers on the different dimensions of the LifeTime platform.
- ❑ **December 2019 :** Market and impact study

RESTORE

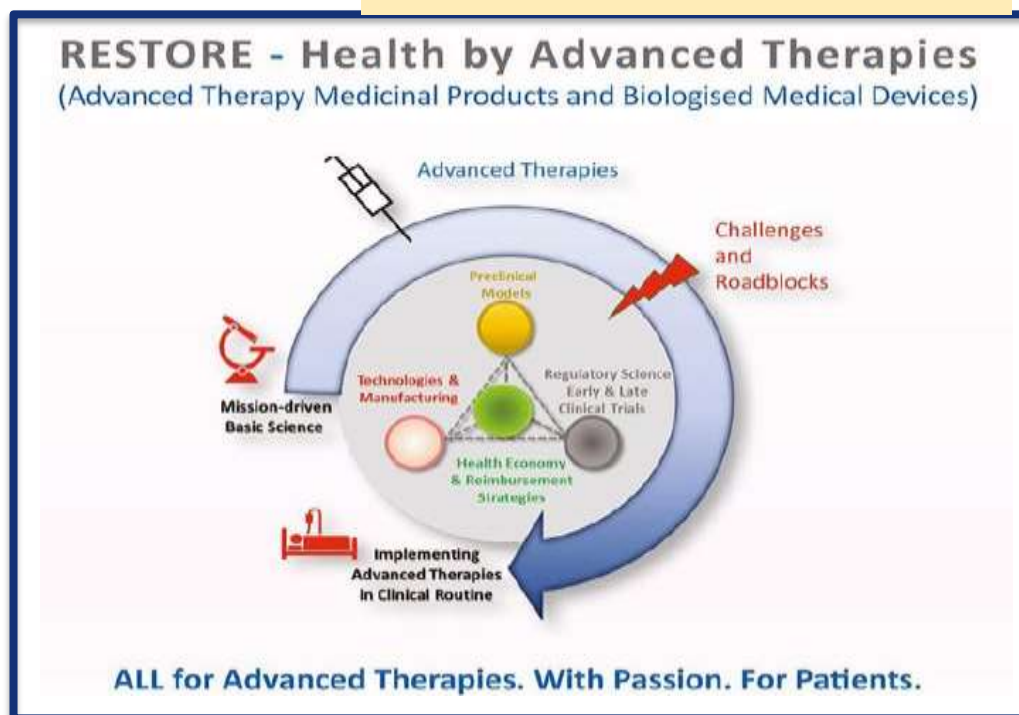

RESTORE aims to use basic science and technology developments to **create new clinical application opportunities of Advanced Therapies from rare to common chronic diseases, to revolutionise manufacturing of Advanced Therapies, to implement and exploit new Advanced Therapies in Clinical Practice** accessible for each citizen in Europe who need it.

IMPACT:

- ❑ Implementation of numerous Advanced Therapy Medicinal products into standard-of-care
- ❑ Novel drug supply chains required as conventional pharmacists cannot deliver the "living" drugs
- ❑ Unlike conventional treatment of chronic diseases, drastic reduction of cost burden/case over time
- ❑ Implementation of reimbursement models for patients travelling (even across national borders)

- ❑ coordinated by Charité Universitätsmedizin Berlin (DE)
- ❑ 10 partners from 7 countries
<https://www.restore-h2020.eu/>

Major planned events:

☐ ***August 2019 - Roadmaps***

- ☐ Mission-driven basic science and technology development for Advanced Therapies
- ☐ Clinical Research for Advanced Therapies
- ☐ Implementation of new Advanced Therapies

☐ ***October 2019***

- ☐ Strategy paper on innovative early and late clinical trial design and regulatory rules for Advanced Therapies

ENERGY-X aims to provide the essential missing component (X) in the **future European energy storage and chemical production landscape**: technologies to replace fossil resources. **ENERGY-X** will contribute to new science and disruptive technology enabling the **efficient conversion of solar and wind energy into chemical form** and will combine this ambition with scale-up to industrially relevant conditions by integrating with European industry.

- ❑ coordinated by DTU (DK)
 - ❑ 13 partners from 9 countries
- <https://www.energy-x.eu/>

IMPACT:

- ❑ Provide fuels for the transport sector
- ❑ Enable energy storage from weeks to months for intermittent electricity production
- ❑ Enable efficient transport of energy between regions in EU and beyond
- ❑ Stabilise the grid by exploiting excess electricity production in EU

Major planned events:

☐ ***May/June 2019 - Roadmaps***

- ☐ Preliminary version of the strategic roadmap
- ☐ Map of relevant Stakeholders

☐ ***June 2019***

- ☐ Joint event with the other Large Scale Research Initiatives

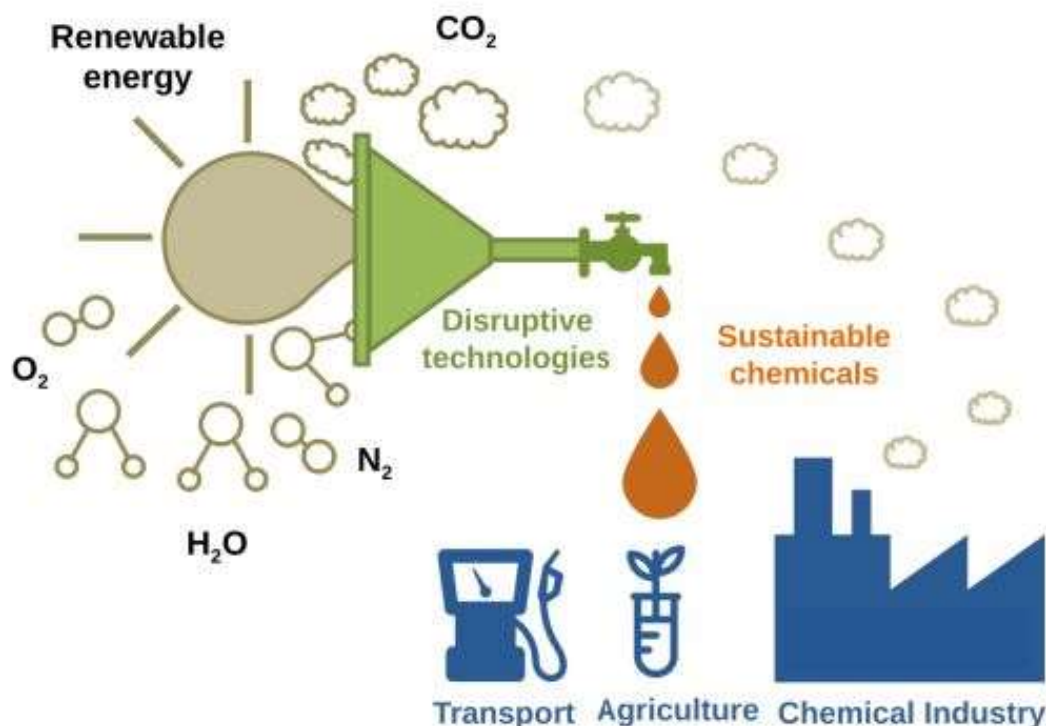

☐ ***February 2020***

- ☐ Final version of the strategic roadmap
- ☐ Roadmap publication and presentation to a broader audience

SUNRISE will make sustainable fuels and commodity chemicals at affordable costs of materials and Earth surface, using sunlight as the only energy source.

- ❑ Coordinated by Leiden University (NL)
- ❑ 20 partners from 13 countries
<https://www.sunriseaction.com/>

Objectives:

- ❑ Develop the S&T roadmap of a future European large scale research initiative;
- ❑ Build the community including scientific, industrial and general public stakeholders;
- ❑ Establish an effective large-project governance scheme.

Major planned events:

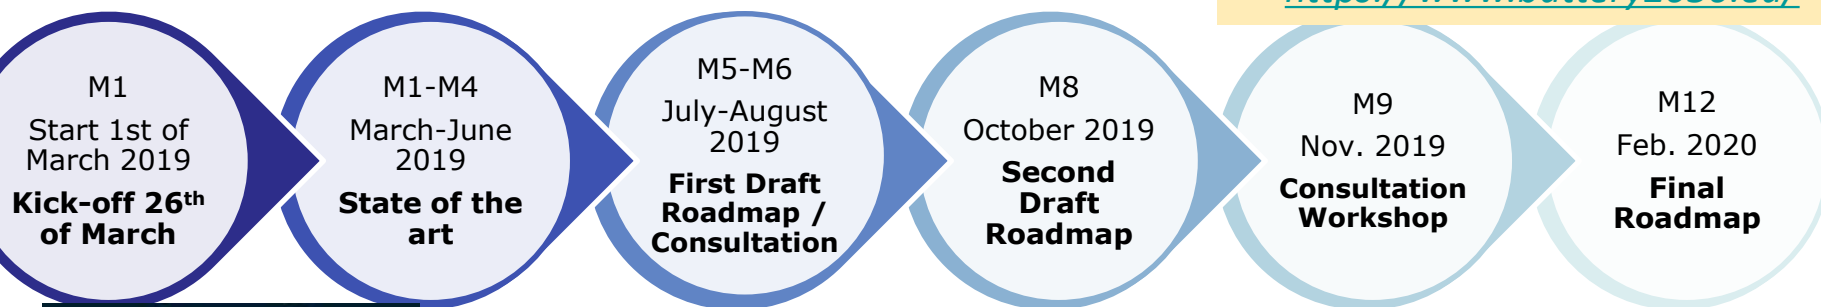

- ❑ May 2019: Ramp-up conference
- ❑ February 2020: SUNRISE Symposium

Major planned deliverables:

- ❑ May 2019 : Vision document
- ❑ September 2019 : Roadmap
- ❑ March 2020: Blueprint - a public document identifying the necessary S&T resources, state-of-the-art EU facilities, available infrastructure & funding, and the criteria to make SUNRISE an open and inclusive initiative.
- ❑ March 2020 : Innovation and Exploitation Plan

***BATTERY 2030+** aim at inventing the batteries of the future with ultra-high performance, full sustainability, and smart design by exploiting the untapped potential of novel, affordable and sustainable materials, chemistries, smart functionalities, and cell designs.*

- ❑ Coordinated by Uppsala University (SE)
- ❑ 17 partners from 9 countries
<https://www.battery2030.eu/>

**Battery 2030
Manifesto**
<http://battery2030.eu>

Objectives:

- ❑ Develop in cooperation with the research community the S&T roadmap of a 10-year cross disciplinary research initiative
- ❑ Propose R&I actions & funding schemes
- ❑ Get support from key stakeholders and EU Member States

Main meetings / events	On-going Discussions Established contacts
9th of October 2018 – Germany, BMBF & PtJ	Greece/Cyprus
13th of Feb. Norway – inv. by BoF repr	The Netherlands
15th of Feb. Finland – inv. by BoF repr	Portugal
19th of Feb. UK – Faraday Institute	Israel
12th of March. Sweden – inv. Innoenergy. Minister for Enterprise	Austria
12th of March. Denmark – the Danish Battery Society	Switzerland
20th of March. Serbia – inv. SASA	
4th of April – Kraftwerke batterien conference Achen	
8-9th of April. Polen – PolStorEn	
25th of April. Turkey – inv. National contact point FET. Tentative date.	
7th of June. France	
28th of June. Italy	
November 2019, Presentation of the BATTERY 2030+ roadmap, Brussels	

Planning to contact: Bulgaria, Czech Republic, Latvia, Lithuania, Romania, Slovakia

Links to Mission Areas

	Humane AI	Time Machine	Lifetime	Restore	Energy-X	Sunrise
Adaptation to Climate Change						
Cancer						
Healthy Oceans						
Carbon-Neutral Smart Cities						
Soil Health for Sustainable food						

Disclaimer: tentative assignment based on current state of play

Links to Partnerships

	Humane AI	Time Machine	Lifetime	Restore	Energy-X	Sunrise
Health Innovations						
Digital Technologies						
Metrology						
Air Traffic, aviation and rail						
Circular, bio-based solutions						
Energy Storage						
Future Mobility						
Innovative SMEs						

Disclaimer: tentative assignment based on current state of play

Links to Pillar II clusters

	Humane AI	Time Machine	Lifetime	Restore	Energy-X	Sunrise
Health						
Inclusive and Secure Societies						
Digital and Industry						
Climate, Energy and Mobility						
Food and Natural Resources						

Disclaimer: tentative assignment based on current state of play

Communication activities on the preparatory Flagship actions

- ❑ *EC communication campaign for these “6+1” topics*

5 March 2019

Launch of six European initiatives with potential for transformational impact on society and the economy

7 March 2019

Battery 2030+: inventing the batteries of the future

- ❑ *Press releases by individual actions*
 - **“HUMANE AI”**: DFKI LEADS AN EU-WIDE DRIVE TOWARDS HUMAN-CENTRIC, ETHICAL, VALUE-ORIENTED AI TECHNOLOGY
 - Chancellor Angela Merkel praises **LifeTime**
 - THE RESEARCH INITIATIVE **RESTORE** HEALTH – THERAPIES THAT CURE
 - **SUNRISE**, a preparatory action towards a European large-scale research initiative
 - New research initiative will power up Europe’s **battery** revolution

What's next

European
Commission

• 25/3: **Workshop of Preparatory Actions with Commission services** to prepare for strategic planning

• ~June: **Horizon Europe strategic planning orientations** shared with Member States (tbc)

• Summer: launch of **Horizon Europe strategic planning public consultation**

• Early September: all preparatory actions have a draft plan to propose and engage in discussions

• 24-26 September: **Research and Innovation days** in Brussels

• January 2020: publication of **strategic planning** for the 4 first years of Horizon Europe

• Autumn 2019-Spring 2020: preparation of first **work programmes** under Horizon Europe
