

## FLAG-ERA JTC2017 and JTC2019

### Project extension procedure

In view of the recent pandemic and its global impact on research activities, the FLAG-ERA JTC2017 and JTC2019 call steering committees have agreed to open the option to request extensions of funded projects, when deemed necessary.

Maximal end-date for the projects are:

- December 31<sup>st</sup>, 2021 – for projects funded within JTC2017
- 6 months after original project end – for projects funded within JTC2019

#### Project extension procedure

- The project coordinator asks for an official extension of the project, in the name of the entire consortium, to the call secretariat:
  - o The request is sent via e-mail.
  - o This request must indicate the new official requested end-date of the project and must be accompanied by a small justification.
- The call secretariat transfers this request to all involved funding agencies, which provide feedback on the possibility of extension (conditions and duration) of their respective researchers.
- Extension requests will be discussed on a case-by-case basis by all involved funding agencies. Once agencies reach an agreement, the call secretariat contacts the project coordinator to inform on the decision of extension.
- All project participants contact their respective funding agencies to proceed with the extension at the national/regional level. All consortium partners should request the same extension from their respective agencies in order for the projects to end at the same time in the respective countries.
