Description of content		This deliverable summarises the JTC 2017 pre-proposal selection outcome.			
Publishable abstract		The FLAG-ERA Joint Transnational Call (JTC) 2017 followed a 2-step procedure. In the first step, 69 pre-proposals were received. Following the eligibility analysis and the scientific evaluation of the proposals, 41 of them were selected for proceeding to the second step.			
Keywords		Joint Transnational Call, 2-step procedure, 1st step selection			

Introduction

The FLAG-ERA Joint Transnational Call (JTC) 2017 followed a 2-step procedure. In the first step, 69 pre-proposals were received. Two of them were clearly ineligible and therefore not evaluated. Out of the 67 others, which were evaluated by the Scientific Evaluation Panels, 44 were evaluated above threshold. Out of these, 3 were finally declared ineligible. Since the overall requested budget was below the threshold of three time the available call budget, all applicants for the pre-proposals above threshold and eligible were invited to submit a full proposal (i.e., 41 applicants). The table below provides the numbers per topic.

	Graphene		HBP	Total
	Basic research	Applied research and innovation	Basic and applied research	
Number of pre-proposals submitted	24	28	17	69
Number of pre-proposals evaluated	24	27	16	67
Number of pre-proposals above threshold	18	15	11	44
Number of pre-proposals above threshold and eligible	18	14	9	41

The feedback to the applicants was sent on 2 July 2017. The evaluation consensus report were sent to all applicants of eligible pre-proposals.

The information was published as a news highlight on the FLAG-ERA web site:
